Invitation

7th ISEA Winter School in Sports Engineering “Innovation in winter sports”

February 24th – March 2nd, 2018 in Östersund, Jämtland, Sweden

Welcome to Sweden and Östersund, Jämtland – a melting pot for research, sports, business, entertainment and recreation.

The 7th ISEA Winter School will focus on innovations in winter sports, providing students with the opportunity to enhance their knowledge and expertise on ski, snowboard, cross country ski and other winter sports as well as safety, especially in relation to the effect of different devices, design solutions and protective equipment.

Lectures will be mixed with technical sessions and experimental projects, and advanced field data collection and analysis. “Hands-on” experience in the application of various sensors and technical systems in the studies related to different aspects of the product development and testing is one of the key aspects. Students will have an opportunity of conducting pilot research studies in many exciting projects related to the sports and outdoor products, research equipment and design and maintenance of the winter sports parks and terrain.

Welcome to register online
